SUBJECT: Urgent Request to Address Mosquito Outbreak in Anna Nagar

Respected Sir/Madam,

I, John Doe, a resident of Anna Nagar, would like to bring to your attention a serious public health concern in our area. We have been experiencing a significant increase in mosquito breeding due to stagnant water in open drains and garbage piles. This has led to a rise in mosquito-borne diseases, such as dengue and malaria, with several residents, including children, falling ill. The lack of proper sanitation and pest control measures is causing widespread fear and health risks among the community. We urgently request immediate action to fumigate the area, clear the stagnant water, and improve hygiene to prevent further outbreaks.

Date: March 25, 2025
